THIS MATERIAL AND ITS CONTAINER MUST BE DISPOSED OF IN A SAFE WAY.

USE APPROPRIATE CONTAINMENT TO AVOID ENVIRONMENTAL CONTAMINATION.

To avoid risks to man and the environment comply with the instructions for use.

COMPLIANCE WITH THE FOLLOWING CONDITIONS OF USE AND ALL SAFETY PRECAUTIONS MARKED* IS A LEGAL REQUIREMENT

FOR USE ONLY AS AN INDUSTRIAL, HORTICULTURAL AND FORESTRY SPREADING AND WETTING AGENT

Maximum individual dose: 400 ml of product per hectare.
READ ALL OTHER SAFETY PRECAUTIONS AND DIRECTIONS FOR USE BEFORE USE

DIRECTIONS FOR USE

Based on revolutionary organosilicone adjuvant technology, Scuba offers a unique solution to a number of difficult spray problems. Used in conjunction with the appropriate insecticide, control of leatherjacket and frit fly can be dramatically improved and, with the appropriate herbicide control of difficult weed plants, such as bracken and gorse can be greatly enhanced.

Scuba is authorised for use with approved pesticides applied in amenity grassland situations and on managed amenity turf;

Tank Mix List

The following are compatible with Scuba:

Ringer (MAPP No. 13289) and other approved carbendazim formulations;

Approved chlorpyrifos based formulations

RATES OF USE

Scuba should be used at a 0.1% rate of the volume of water being used in the spray tank. For example:

Water volume	Required qty of Scuba
50 litres	50 ml
100 litres	100 ml
200 litres	200 ml

MIXING

Half fill the spray tank with clean water, commence agitation, if the sprayer is so equipped. Add the recommended quantity of Scuba. Then add the recommended quantity of pesticide. Continue agitation while topping up the tank and during spraying. If foaming occurs, add a defoamer to remove foam.
