isopropylamine salt of  
Glyphosate

**GALLUP Hi Aktiv is a non-selective non-residual herbicide offering complete weed control in a wide range of conditions. It is a contact-only herbicide controlling weeds present at the time of application but not subsequent germination of weeds.**

### Summary of Directions for Use

GALLUP Hi Aktiv has a very wide range of uses in a wide range of situations. Please refer to the full label before using the product for precise instructions.

### Getting the best from GALLUP Hi Aktiv

- GALLUP Hi Aktiv is a foliar-acting translocated herbicide and best results will therefore be obtained from application to weeds that are actively growing and have sufficient leaf area to allow uptake
- Best control of couch will be obtained from applications to plants that are tillering and where new rhizome growth has started

*Gallup Hi Aktiv contains glyphosate.  
Always read the label:use pesticides safely.*
