Getting the best from GALLUP 360

- Gallup 360 is a foliar-acting translocated herbicide and best results will therefore be obtained from application to weeds that are actively growing and have sufficient leaf area to allow uptake
- Best control of couch will be obtained from applications to plants that are tillering and where new rhizome growth has started

*Gallup contains glyphosate.
Always read the label:use pesticides safely.*

Contains
360g/l Glyphosate
present as 480g/l of the
isopropylamine salt of
Glyphosate

GALLUP 360 is a foliar-applied translocated herbicide for the control of emerged weeds in industrial situations, forestry and aquatic areas.

Non-selective and non residual, it offers complete weed control in a wide range of conditions. It is a contact-only herbicide controlling weeds present at the time of application but not subsequent germination of weeds.
