

Biosorb Fine

Grade 0.5 - 1.0mm

APPLICATION GUIDELINES

Biosorb Fine can be used in a number of ways. The eventual aim is to incorporate 10% by volume into the rootzone.

In Construction

Add 430kg of Biosorb Fine per 100 square metres of rootzone (10% by volume) Rotovate 150mm deep to incorporate.

Incorporation of Biosorb Fine into an existing turf situation:

Use 20 bags of Biosorb Fine per 500 square metres after coring to a depth of approximately 4".

Use 40 bags of Biosorb Fine per 500 square metres after verti-draining to a depth of 8 - 10".

Biosorb Fine is an ideal partner to be included in divot mix - helping to improve germination and recovery times.
