Safety data sheet available for professional user on request.

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work – **UK ONLY**

DIRECTIONS FOR USE

Firebrand is a water-conditioning agent to ameliorate the hardness of water. When sprayed, it conditions the leaves of glyphosate susceptible broad-leaved and grass weeds and thus predisposes the weeds to full and rapid uptake of glyphosate, thereby permitting high efficacy.

IMPORTANT INFORMATION

RATE OF USE

Use Firebrand at 0.5% v/v in the spray solution.

Metric - Amount of Firebrand required per ha				
Spray volume - litres per hectare				
80 l/ha	100 l/ha	150 l/ha	200 l/ha	250 l/ha
0.4 litres	0.5 litres	0.75 litres	1 litre	1.25 litre

Read the label before use. Using this product in a manner that is inconsistent with the label may be an offence. Follow the code of practice for using plant protection products

MIXING

Add the required quantity of Firebrand to the sprayer tank half filled with water and with the re-circulation system in action. Top up the tank to the required level with water. Maintain re-circulation until the tank is sprayed out. Spray immediately after mixing. When tank-mixing Firebrand, the Directions for Use of any products mixed must be strictly observed. Mix Firebrand in the spray tank before adding another product. Spray immediately after mixing.

CARE OF SPRAYER

After each days use, wash out the sprayer thoroughly with water and a recognised cleaning agent.
